902 NE 43<sup>rd</sup> St. Apt. #218

Seattle, WA 98105

## EDUCATION

---

University of Washington || Information School

Sept. 2014 - June 2018

Bachelor of Science in Informatics // Overall GPA 3.70 /4.0

## PROJECTS

---

### Hash Table Implementation

#### Data Structure & Algorithm

November 2016

- Created and implemented a hash table to store counts of colors a picture contains.
- Implemented linear and quadratic probing for collision resolution.
- Created resize, put, and find methods, and returned a number of collisions each time the put or find method was called.

### Penny FYT (Penny For Your Thoughts)

#### DubHacks 2016

October 2016

- Created a penny-based social network website in order to allow a user driven impact through social network site.
- Utilized firebase for user authentication and data storage.
- Managed the appearance by using CSS, and implemented responsive sizing.

### Mapping

#### Client-Side Web programming

October 2016

- Utilized Leaflet JavaScript Library to upload a map onto the web page.
- Grabbed data from an excel file with Ajax request, and processed JSON data to create a table.

## JOB EXPERIENCE

---

### Student Assistant

#### Study Abroad Finance and Administration, U. of Washington

May. 2014 - Present

- Manage and track budgets for 100+ study abroad programs.
- Store and organize student charging information, expenses, field advances, and balances for each study abroad program.
- Resolve issues such as budget confusions, over payments, duplicative payments, and inconsistencies.
- Create reimbursement payments for faculty and staff members.
- Work independently in a time-sensitive environment, and communicate with co-workers by writing concise notes and explaining problems.

## SKILLS & LANGUAGES

---

### Technical Skills

- Experience with Java, HTML, CSS, JavaScript, PHP and Swift.
- Ability to work with Microsoft Office Excel, Power Point, and Word.

### Verbal Languages

- Fluent in Korean (first language) and English (second language).
